SSH Activity Record 2020

April and May 2020

#1

The covid-19 is spreading all over the world including Japan now. Because of that our school is also closed for a period that has never experienced before. It's difficult not only to hold regular lessons and club activities at school, but also to maintain the learning style we have been working with students and teachers.

We SSH Research and Development Section has taken measures to best maintain this situation. In addition to transmitting information using the Internet, we are making a system that allows mutual exchange of information between students and teachers. From this year on, this school has become a collaborative school of BYOD, which is a verification project for Okinawa education centers. An account will be given to each student, and students will be able to exchange information on the Web and have meetings with their peers and teachers. We expect that the SSH related classes at our school will continue to progress through this system.

Even in difficult situations, you will notice, think about, and solve the problem in front of you, We are all working together to persevere through the unknown.

Kyuyo High School
SSH Research and Development Section Chief

● SSH Research I・II・III, International Research I・II Staff Meeting　（April 6th.）

We had a discussion about this year's SSH Research I, II, III and International Research I, II. As there were new teachers in the new academic year, we shared a purpose, an evaluation method and annual program of SSH Research, International Research, and built the system which supported the research activities of students with all the staff. From this fiscal year on, we will promote the use of ICT throughout the school and will continue to enhance our inquiry activities.

Regarding other activities, in order to prevent the spread of covid19, suspension and postponement have occurred because of school closures.

● A Study Trip to Tokyo and Tsukuba

Reservation for National Science Museum, High Energy Accelerator Research Organization, Materials and Materials Research Organization, RIKEN,JAXA. Preparing for the 1st Leader Meeting.
