

Kyuyo SSH Activity Record 2023 (February)

"The 3rd Organizational Guidance Committee Meeting" (2023.2.1.Fri)

During the 3rd Organizational Guidance Committee meeting, it was evaluated by Mr. Yamashiro that students' mathematical abilities have improved and that their progress is influenced by the guidance provided by high school teachers. Mr. Maeno praised the students' enthusiastic attitude towards their presentations and their confident demeanor. Mr. Furukawa made suggestions for improvements in geoscience presentations and pointed out overall skill enhancements. Ms. Fukumoto confirmed the improvement in students' research abilities, while Mr. Teruya emphasized the significance of enhancing presentation skills and fundamental knowledge.

Mr. Kogure expressed his impression of the impressive English posters. The guidance and support yielded positive results, as evident from the students' skill improvements and overcoming shyness. However, there were also challenges identified, such as the need for further support during the presentation event and strengthening fundamental knowledge.

International STEAM Challenge in Okinawa: ISCO (2023.2.20.月)

The "International STEAM Challenge in Okinawa" was a collaborative effort between Kyuuyo High School and Okinawa Christian School International (OCSI), where multinational teams were formed to participate. All interactions were conducted in English, providing a learning environment that transcended the boundaries of science and technology.

The mission was to design and create a launching device to propel a badminton shuttle over obstacles and land it on the target. Participating students engaged in lively discussions and worked together to achieve the mission's objectives. Through this challenge, the students not only developed their skills in science, technology, engineering, arts, and mathematics (STEAM) but also honed their English communication abilities while learning the importance of international collaboration.

Kyuyo International Forum for Science: KIFS (2023.2.22.Wed)

The Kyuyo International Forum for Science brought together students from three countries, Japan (Kyuyo), Thailand, and Taiwan, facilitating a vibrant academic exchange. Research presentations from various fields such as physics, chemistry, biology, and mathematics were shared, fostering a global perspective and knowledge exchange.

All presentations and Q&A sessions were conducted in English, providing students with valuable experiences that not only enhanced their scientific discussions but also improved their language proficiency. This international forum has been instrumental in nurturing students' scientific curiosity and communication skills, contributing to their overall growth and development.
