

## 2019 Activity Record

### December 14<sup>th</sup>, 2019 The 8<sup>th</sup> Annual SCORE! In Okinawa

The 8<sup>th</sup> Annual SCORE! In Okinawa was held at OIST on the 14<sup>th</sup> of December, and eight teams from Kyuyo high school participated in it.

This event is judged by the viewpoint of how this science project can be useful to the business and daily life, and how the research can make our life better. Our team, which investigated the research with the theme with “The troublesome can be helpful! Let’s use introduced species as preventative measures against heat stroke”, won the 2<sup>nd</sup> prize!

This project was to utilize Mile-a-minute weed as invasive creatures in Okinawa. The students analyzed the various component of the plant, and found out that the tea used by the plant can be effective to the heat related stroke. This subject will keep on going and we hope the students will find something new again.

### December 18<sup>th</sup>, 2019 In School Presentation divided by the field

In school presentation divided by the field was held on the 18<sup>th</sup> of December. The students have picked one of the fields from physics, chemistry, biology, earth science, and mathematics, and have studied. They made presentation and had discussion from various point of view with our teachers and instructors from the University of Ryukyu. In addition, 1<sup>st</sup> year Kyuyo high school students and junior high school students also joined the program.
