

2019 Activity Record

January 7th to 10th, 2020 SSH Taiwan Science Tour in China

Image : Students in Taiwan Science Tour

2nd year science and mathematics students and two teachers and a vice principle went to Taiwan for science tour from 7th to 10th of January. The selected students desperately took prior training and made poster and power point presentation in English.

The students had poster session and power point presentation at Taipei Municipal Chaenggong High School and The Affiliated Senior High School of National Taiwan Normal University, and had meaningful and academic discussion with the students at those school. Even though our students struggled to talk in English to the students in Taiwan, the teachers at those school were pleased to see our students trying the best they could. They also visited Yaryu National park, National Taiwan Museum of Science and Education, and Taipei City Zoo, and learned many things like severity of nature, interest toward science, and diversity of organism. It seems that the science tour is definitely fit to our students when we see them take positive action even after the tour.

January 7th to 12th, 2020 Science Tour in China

Image : Students in Science Tour in China

1st and 2nd year selected students of six and a teacher participated in the Science tour in China. The students took some courses in English through doing their research, have done their best they could.

In China, our students talked about the science and interacted with the students at Yucai high school and Hanyo pharmaceutical university in Hanyo city. The iCeMS researchers at Kyoto university and teachers and students of Kyoto Gakuen high school helped us study the program and have great time.

Our students had a meeting every day and shared what they realized and learned for deeper understanding of the program. It seems that this tour was very meaningful for the students to improve attitude toward learning after the tour.

January 14th , 2020 The Presentation of Study Quest1

Image : Students in Presentation of Study Quest1

We held a presentation by the second graders of the high school on January 14th.

The students and the teaching teachers began to work out of their hands, but they presented various data and knowledge at this presentation. There was a lot of research activities. Students were discussing various kinds of discussions at the recital. This is a meaningful presentation that can also be expected for future activities.
