#11 2016 SSH Taiwan Science Trip

From January 4th to 7th, Kyuyo High School's SSH project is going to have a SSH Taiwan Science Trip. We had this program last year and it was a wonderful experience for our students. This year, we are going to the two high schools in Taiwan and had some exchange programs with them, and we are also visiting some institutions related with science.

Last year, three teams participated in this program and had great experiences. Before going to the trip, they completed English posters based on their research themes, then, practiced hard for their presentations in the Taiwanese high schools.

In addition, they went to the Geology Park and National Park. These four days were very hard for them because they had to learn a lot of things, however, they discovered many new things and it was a nice experience for them.

This year's program is sure to be a wonderful one, too. We are recruiting seven students to take part in this program. Please join us this year for another wonderful experience.
