## #10 Lecture for Presentation by OIST

On October 13th, we had a lecturer from OIST, Mr. Holland Thomas, give a lecture about poster presentation. This lecture is for 2nd grade Science and Mathematics Course students in order to give them some tips for their English posters in their Science English class. Mr. Holland taught us how to do a great presentation with slides. It was a nice experience for us to learn a way of giving effective presentations in English.

He showed us some examples of good and bad posters, and explained the differences between them. Then, he talked about poster presentation guidelines. There are seven guidelines for presentations and they are very important when making a presentation. As we all are going to make a presentation in March, we have to keep these guidelines in mind.

There are many important things we have to remember. This lecture helped us a lot to prepare for our presentations. We will do our best for our presentations to make good use of what we learned today.
