#9: We took part in the Japanese Plant Society

The Japanese Plant Society was held from September 16th to 19th at the Convention Center in Ginowan City. This was the first time it was held in Okinawa. There were poster presentations and some of the students from our school joined the presentation.

● Impressions of Participants

"My view toward the world was changed by being in such a place. I could step this new world."

"I could find out the weak points of our research and what we must be careful for. I want to reach a conclusion that can convince a lot of people."

"I was surprised at the level of the other school's research and presentations. I received a lot of encouragements from the other high school students. And I could understand how they were doing their researches and thinking about it. It influenced me into doing my research."
