

## December 2020

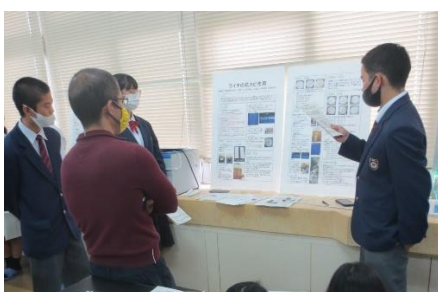

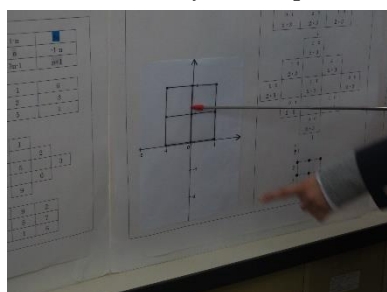

### 2nd grade Science and Mathematics SSH Science and Mathematics Explorations II Final Presentation by Field (2020.12.16.)

On December 16th, the final presentation of the SS Science and Mathematics Exploration II was held by field. The participants were teachers of the steering committee, teachers in charge, first-year high school science and mathematics students, and junior high school students. The high school students who gave presentations made use of what they had experienced in the mid-term

presentation, and everyone gave their presentations in a dignified manner.

< Impressions from the younger students >

I was able to understand most of the content of what looked like difficult research with the easy-to-see posters and detailed explanations. I am now looking forward to my own research which will be done in another year.

### 2nd grade International English International inquiry I research presentation and opinion exchange meeting (2020.12.24.)

On Thursday, December 24th, the 2nd grade International English held a research presentation on International Studies I. Each group took time after school in advance to discuss the content of their presentation and prepare for their presentation. They did their best to answer the sharp questions from the teachers of the University of the Ryukyus and the 2nd grade

science and mathematics students. It is a great achievement that we were able to reflect on our research throughout the year. Let's continue to work hard to improve our research!

After the presentation, Kyuyo teachers and teachers from the University of the Ryukyus held an opinion exchange meeting to discuss how to improve International inquiry I.
