

## Kyuyo SSH Activity Record 2022 ( June )

### Kyuyou Festival (2023.6.16-17.Fri.-Sat.)

At the "Kyuyou Festival", the Biology and Chemistry Clubs conducted a variety of exhibitions. The Biology Club carried out leaf vein specimen creation and diverse biological specimen displays, along with thorough introductions to members' research. The Chemistry Club held captivating experimental shows and also introduced their members' research. Over the two days of the festival, the number of visitors exceeded 300 in total, allowing many people to experience the educational and attractive aspects of each exhibit. These activities resulted in a deepened understanding of science among participants and sparked their interest, bringing about a successful outcome.
