

2019 Activity Record

May 7th, 2019 School Special Subject 「Study QuestI」 Workshop for SDGs, Okinawa 21st century vision

Image: Orientation at the martial art gym

1st year students of international English course took a workshop to learn what SDGs and Okinawa 21st century vision are about. The workshop was held in the gym.

Ms. Ganeko Kanako, who is Okinawa prefectural education center, explained the SDGs and Okinawa 21st century vision, and taught the students what kind of viewpoint the students need to decide the theme. The students experienced not only the discussion but also talking with each group and teaching each other for further understanding.

When it comes to the theme as “education”, there are different sizes like Asia, Japan, or worldwide with various age group. When the viewpoint of “5W1H” is used, the students seem to understand deeper in terms of the idea of their theme.

May 15th, 2019 School Special Subject 「SS Science and MathematicsII」 review meeting of the theme

The theme review meeting was held on the day of 15th of May, 5th and 6th period for the 2nd year students. The meeting was divided into five groups (physics, chemistry, biology, earth science, and mathematics), and the students made presentations about their research themes, hypothesis, and research plans in front of expert instructors from the University of Ryukyu. After the presentations the instructors, gave the students useful advice to make their research better. It seemed that it was difficult to make the presentation, but some of the groups tried to get the instructors' interest during presentations.

Although the students might want to relax after the presentations, “this is just the beginning!” The students made some changes in plans to make it better as they kept on studying, and seek the truth that nobody has ever reached, do the best you can.

May 15th, 2019 The first Guidance Committee

After the theme review meeting of SS Science and MathematicsII, the first guidance committee was held with expert instructors from the University of Ryukyu, and high school teachers who actually support the students' research. This year's instructors are Mr. Kogure Kazuhiro (a trustee of the University of Ryukyu, a vice president), Mr. Nakaza Hizo (a professor of department of engineering), Mr. Tuji Mizuki (a professor of department of agriculture), Mr. Sugio Koji (a professor of department of education of graduate school of the University of Ryukyu), Mr. Furukawa Masahide (an associate professor of department science), Mr. Teruya Toshiaki (a professor of department of education), Maeno masahiro (an associate professor of department of science), and Mr. Yamashiro Koichi (an associate professor of department of education). Mr. Kogure was selected as this year's chairperson of this committee.

Main discussions were this year's SSH plans and the theme review meeting. Instructors talked about the review meeting and they were impressed to see students' presentation skills, positive participation. The instructors gave positive impression especially about teachers' guiding skills even though each year there are different students.
